Subject Index of Volume 686

Ab initio calculations
Classical planar doubly bonded Si-substituted silenes—a boundary system between olefins and heavier Group 14 analogs: Geometric and electronic structures, rotational barriers about the Si=C double bond, and comparison with the analogs and isoelectronic phosphenes, further evidence against C-ylides of silicon, 257
Comparison of steric hindrance in silylenium and carbenium cations and their complexes: Natural steric analysis, 164
Tertiary trisilyloxonium ion in cationic ring-opening polymerisation of a model cyclic siloxane, octamethyl-1,4-dioxatetrasilacyclohexane, 373
Acid Catalyst
Acid-catalyzed intramolecular addition of a carboxy group to vinylsilanes, 242
Activation energy
Compensation effect in trichlorosilane synthesis, 151
ADMET copolymerization
Synthesis and structural characterization of *trans*-tactic siloxylene-vinylene-*p*-phenylene polymers via ADMET copolymerization and silylative coupling (SC) polycondensation, 228
Alkenes
Classical planar doubly bonded Si-substituted silenes—a boundary system between olefins and heavier Group 14 analogs: Geometric and electronic structures, rotational barriers about the Si=C double bond, and comparison with the analogs and isoelectronic phosphenes, further evidence against C-ylides of silicon, 257
Allosteric modulators
Synthesis and pharmacological characterization of new silicon-based W84-type allosteric modulators for ligand binding to muscarinic M_2 receptors, 75
Allylsilane
Cationic rearrangements controlled by the presence of a silyl group, 84
Aminosiloxanes
Intramolecular rearrangement of organosilyl groups between oxygen and nitrogen in aminosiloxanes: A joint experimental–theoretical study, 16
Aromatic C–H bonds
The ruthenium-catalyzed silylation of aromatic C–H bonds with triethylsilane, 134
Azobenzene
Synthesis, crystal structure, and photoreaction of a disiloxane bearing two 2-(phenylazo)phenyl groups, 192

Base-coordinated silylene
Thermolysis of bis(pentacoordinate) silicon compound bearing two 1-fluorodisilanyl units at 4- and 8-positions on 1,5-bis(dimethylamino)naphthalene ring: construction of disilapyrene skeleton and cyclophane-shaped siloxane dimer, 215
Bicyclosilaoxolanes
Intramolecular cycloadditions of silacarbonyl ylides tethered to unactivated dipolarophiles: a new route to bicyclosilaoxolanes, 368
Bis-imination reactions
Syntheses of novel *N*-[bis(trimethylsilyl)methyl]-1,2- and 1,3-diamines, 306
Bis(pentacoordinate) silicon compound
Thermolysis of bis(pentacoordinate) silicon compound bearing two 1-fluorodisilanyl units at 4- and 8-positions on 1,5-bis(dimethylamino)naphthalene ring: construction of disilapyrene skeleton and cyclophane-shaped siloxane dimer, 215
Bis(silacyclopropa)benzenes
Syntheses and structures of silicon analogues of cyclopropabenzenes, 118
π-bond energies
Classical planar doubly bonded Si-substituted silenes—a boundary system between olefins and heavier Group 14 analogs: Geometric and electronic structures, rotational barriers about the Si=C double bond, and comparison with the analogs and isoelectronic phosphenes, further evidence against C-ylides of silicon, 257
Boron
gem-Silylborylation approach for tri- and tetrametalmethanes: the first synthesis of boryl(germyl)(silyl)(stannyl)methanes, 286

Caldine
Syntheses of novel *N*-[bis(trimethylsilyl)methyl]-1,2- and 1,3-diamines, 306
Calorimetry
Compensation effect in trichlorosilane synthesis, 151
Carbenium ion
Comparison of steric hindrance in silylenium and carbenium cations and their complexes: Natural steric analysis, 164
Carbenoid
gem-Silylborylation approach for tri- and tetrametalmethanes: the first synthesis of boryl(germyl)(silyl)(stannyl)methanes, 286
Catalysis
$GaCl_3$-catalyzed α-ethynylation reaction of silyl enol ethers, 94
C–H bond cleavage
The ruthenium-catalyzed silylation of aromatic C–H bonds with triethylsilane, 134
Chemical shift tensor
The chemical shift tensor of silylenes, 251
Chloroethyne
$GaCl_3$-catalyzed α-ethynylation reaction of silyl enol ethers, 94
Chlorosilane
Hydrosilylation in the 2D interlayer space between inorganic layers: reaction between immobilized C=C groups on the interlayer surface of layered perovskite $HLaNb_2O_7 \cdot xH_2O$ and chlorohydrosilanes, 145
C–H/SiR_3 coupling
The ruthenium-catalyzed silylation of aromatic C–H bonds with triethylsilane, 134
Cocondensation
Dihalodimethylsilanes from silicon atoms and methyl halides: a combined matrix-spectroscopic and density functional theory study, 341
Co-hydrolysis and polycondensation

Elsevier B.V.
doi:10.1016/S0022-328X(03)01028-3

Synthesis of multilayered silica-based hybrid films from difunctional organosilanes by co-hydrolysis and polycondensation with tetraalkoxysilane, 223
Compensation effect
Compensation effect in trichlorosilane synthesis, 151
Computational chemistry
The chemical shift tensor of silylenes, 251
Copper
Synthesis and characterisation of bis(amino)silylene–nickel(0),–palladium(II),–platinum(0),–platinum(II) and copper(I) complexes, 321
Copper reagent
Selective synthesis of halosilanes from hydrosilanes and utilization for organic synthesis, 3
Crystallographic structural analysis
Syntheses and structures of silicon analogues of cyclopropabenzenes, 118
Crystal structure
Tip-substituted cage and cyclic silanols, 175
Cyanoethylation reactions
Syntheses of novel *N*-[bis(trimethylsilyl)methyl]-1,2- and 1,3-diamines, 306
Cyclic siloxanes
Tertiary trisilyloxonium ion in cationic ring-opening polymerisation of a model cyclic siloxane, octamethyl-1,4-dioxatetrasilacyclohexane, 373
Cyclic stannasilanes
Magnesium and chlorostannanes—building blocks for novel tinmodified silanes, 332
Cyclization
Acid-catalyzed intramolecular addition of a carboxy group to vinylsilanes, 242
Cycloadditions
α,β-Unsaturated thioacylsilanes as efficient dienes in hetero Diels–Alder reactions, 363
Cyclobutanes
Classical planar doubly bonded Si-substituted silenes—a boundary system between olefins and heavier Group 14 analogs: Geometric and electronic structures, rotational barriers about the Si=C double bond, and comparison with the analogs and isoelectronic phosphenes, further evidence against C-ylides of silicon, 257
Cyclophane
Thermolysis of bis(pentacoordinate) silicon compound bearing two 1-fluorodisilanyl units at 4- and 8-positions on 1,5-bis(dimethylamino)naphthalene ring: construction of disilapyrene skeleton and cyclophane-shaped siloxane dimer, 215
2+2 cycloreversion
Classical planar doubly bonded Si-substituted silenes—a boundary system between olefins and heavier Group 14 analogs: Geometric and electronic structures, rotational barriers about the Si=C double bond, and comparison with the analogs and isoelectronic phosphenes, further evidence against C-ylides of silicon, 257

DFT calculations
Synthesis and molecular structure of fluoro(triphosphanyl)silane and attempts to synthesize a silylidyne–phosphane, 294
Diaryldilithiosilane
Syntheses and structures of silicon analogues of cyclopropabenzenes, 118
1,3-Digermacyclobutanes
Classical planar doubly bonded Si-substituted silenes—a boundary system between olefins and heavier Group 14 analogs: Geometric and electronic structures, rotational barriers about the Si=C double bond, and comparison with the analogs and isoelectronic phosphenes, further evidence against C-ylides of silicon, 257
1,6-Dihydro-1,6-disilapyrene
Thermolysis of bis(pentacoordinate) silicon compound bearing two 1-fluorodisilanyl units at 4- and 8-positions on 1,5-bis(dimethylamino)naphthalene ring: construction of disilapyrene skeleton and cyclophane-shaped siloxane dimer, 215
Dimerization
Relationship between stability and dimerization ability of silylenes, 112
Dion–Jacobson phase
Hydrosilylation in the 2D interlayer space between inorganic layers: reaction between immobilized C=C groups on the interlayer surface of layered perovskite $HLaNb_2O_7 \cdot xH_2O$ and chlorohydrosilanes, 145
Diphenylacetylene
Thermolysis of bis(pentacoordinate) silicon compound bearing two 1-fluorodisilanyl units at 4- and 8-positions on 1,5-bis(dimethylamino)naphthalene ring: construction of disilapyrene skeleton and cyclophane-shaped siloxane dimer, 215
1,3-Diphosphacyclobutanes
Classical planar doubly bonded Si-substituted silenes—a boundary system between olefins and heavier Group 14 analogs: Geometric and electronic structures, rotational barriers about the Si=C double bond, and comparison with the analogs and isoelectronic phosphenes, further evidence against C-ylides of silicon, 257
1,3-Dipoles
Intramolecular cycloadditions of silacarbonyl ylides tethered to unactivated dipolarophiles: a new route to bicyclosilaoxolanes, 368
Direct reaction
Compensation effect in trichlorosilane synthesis, 151
Disilacyclobutane
Synthesis and characterization of cyano-substituted disilacyclobutane rings and poly(silylenemethylene) polymers, 272
1,3-Disilacyclobutanes
Classical planar doubly bonded Si-substituted silenes—a boundary system between olefins and heavier Group 14 analogs: Geometric and electronic structures, rotational barriers about the Si=C double bond, and comparison with the analogs and isoelectronic phosphenes, further evidence against C-ylides of silicon, 257
Disilanes
Halide induced epimerization of *meso*-1,2-dihalo-1,2-diaryl-1,2-dimethyldisilanes, 66
Disiloxane
Synthesis, crystal structure, and photoreaction of a disiloxane bearing two 2-(phenylazo)phenyl groups, 192
1,1-Disilylcarbinol
Cationic rearrangements controlled by the presence of a silyl group, 84
Divinyldisiloxane
Synthesis and structural characterization of *trans*-tactic siloxylene-vinylene-*p*-phenylene polymers via ADMET copolymerization and silylative coupling (SC) polycondensation, 228
Dyotropic rearrangement
Synthesis, structure and isomerization of $A_2Si{=}SiB_2$-type tetrakis(trialkylsilyl)disilenes, 105

Electronic effect
Electronic and steric effects of silyl groups in silicon-directed Norrish type cleavages, 198
Epimerization
Halide induced epimerization of *meso*-1,2-dihalo-1,2-diaryl-1,2-dimethyldisilanes, 66
α-Ethynylation
$GaCl_3$-catalyzed α-ethynylation reaction of silyl enol ethers, 94

Excimer
Synthesis and photophysical properties of novel fluorescent silicones, 101

Ferrocenylenesilyl
Bis-silyl substituted ferrocenylenes, including dicyanovinyl electron-withdrawing groups, as potential non-linear optical materials, 235
Flash-vacuum-pyrolyses
Synthesis and molecular structure of fluoro(triphosphanyl)silane and attempts to synthesize a silylidyne–phosphane, 294
Fluorescence
Synthesis and photophysical properties of novel fluorescent silicones, 101
Fluoride ion
Novel fluoride ion mediated synthesis of unsymmetrical siloxanes under phase transfer catalysis conditions, 52
Fluorosilanes
Synthesis and molecular structure of fluoro(triphosphanyl)silane and attempts to synthesize a silylidyne–phosphane, 294
Synthesis and reactivity of a novel oligosilyl anion, 158

Gallium(III) chloride
$GaCl_3$-catalyzed α-ethynylation reaction of silyl enol ethers, 94
gem-Silylborylation
gem-Silylborylation approach for tri- and tetrametalmethanes: the first synthesis of boryl(germyl)(silyl)(stannyl)methanes, 286
Germenes
Classical planar doubly bonded Si-substituted silenes—a boundary system between olefins and heavier Group 14 analogs: Geometric and electronic structures, rotational barriers about the Si=C double bond, and comparison with the analogs and isoelectronic phosphenes, further evidence against C-ylides of silicon, 257
Germyl
Silylgermylstannylmethanes, 379
Grafting reaction
Hydrosilylation in the 2D interlayer space between inorganic layers: reaction between immobilized C=C groups on the interlayer surface of layered perovskite $HLaNb_2O_7 \cdot xH_2O$ and chlorohydrosilanes, 145
Group 14
Silylgermylstannylmethanes, 379
Grubbs catalyst
Synthesis and structural characterization of *trans*-tactic siloxylene-vinylene-*p*-phenylene polymers via ADMET copolymerization and silylative coupling (SC) polycondensation, 228

Halogenation
Halide induced epimerization of *meso*-1,2-dihalo-1,2-diaryl-1,2-dimethyldisilanes, 66
Halohydrosilane
Selective synthesis of halosilanes from hydrosilanes and utilization for organic synthesis, 3
Halomethane
gem-Silylborylation approach for tri- and tetrametalmethanes: the first synthesis of boryl(germyl)(silyl)(stannyl)methanes, 286
Halosilane
Selective synthesis of halosilanes from hydrosilanes and utilization for organic synthesis, 3
Hemilabile ligands
Reaction of hydrogenosilanes with dimethyl Pt(II) complexes promoted by hemilabile P,N-chelating ligands, 183
Heterodienes (thiabutadienes)
α,β-Unsaturated thioacylsilanes as efficient dienes in hetero Diels–Alder reactions, 363
Hexacoordinate
Donor-stabilized silyl cations: Part 7: Neutral hexacoordinate and ionic pentacoordinate silicon chelates with *N*-isopropylideneimino-acylimidato ligands, 202
H-halogen exchange
Selective synthesis of halosilanes from hydrosilanes and utilization for organic synthesis, 3
Hybrid material
Synthesis of multilayered silica-based hybrid films from difunctional organosilanes by co-hydrolysis and polycondensation with tetraalkoxysilane, 223
Hybrid xerogels
Synthesis and characterization of alkylene-bridged silsesquicarbodiimide hybrid xerogels, 127
Hydrogen bonding
Tip-substituted cage and cyclic silanols, 175
Hydrosilane
Selective synthesis of halosilanes from hydrosilanes and utilization for organic synthesis, 3
Hydrosilylation
Hydrosilylation in the 2D interlayer space between inorganic layers: reaction between immobilized C=C groups on the interlayer surface of layered perovskite $HLaNb_2O_7 \cdot xH_2O$ and chlorohydrosilanes, 145
σ–π Hyperconjugation
Electronic and steric effects of silyl groups in silicon-directed Norrish type cleavages, 198

Interlayer surface modification
Hydrosilylation in the 2D interlayer space between inorganic layers: reaction between immobilized C=C groups on the interlayer surface of layered perovskite $HLaNb_2O_7 \cdot xH_2O$ and chlorohydrosilanes, 145
Intranolecular cycloaddition
Intramolecular cycloadditions of silacarbonyl ylides tethered to unactivated dipolarophiles: a new route to bicyclosilaoxolanes, 368
Ionization
Donor-stabilized silyl cations: Part 7: Neutral hexacoordinate and ionic pentacoordinate silicon chelates with *N*-isopropylideneimino-acylimidato ligands, 202
Irradiation
Synthesis, crystal structure, and photoreaction of a disiloxane bearing two 2-(phenylazo)phenyl groups, 192
Isodesmic reaction energy
Relationship between stability and dimerization ability of silylenes, 112
Isomerization
Intramolecular rearrangement of organosilyl groups between oxygen and nitrogen in aminosiloxanes: A joint experimental–theoretical study, 16
Synthesis, crystal structure, and photoreaction of a disiloxane bearing two 2-(phenylazo)phenyl groups, 192

γ-lactone
Acid-catalyzed intramolecular addition of a carboxy group to vinylsilanes, 242
Layered perovskite
Hydrosilylation in the 2D interlayer space between inorganic layers: reaction between immobilized C=C groups on the interlayer surface of layered perovskite $HLaNb_2O_7 \cdot xH_2O$ and chlorohydrosilanes, 145
Lithium
Synthesis of the first long-lived bis-silene, 58
Lithium salts
Intramolecular rearrangement of organosilyl groups between oxygen and nitrogen in aminosiloxanes: A joint experimental–theoretical study, 16

Magnesium
Magnesium and chlorostannanes—building blocks for novel tinmodified silanes, 332
Matrix isolation
Dihalodimethylsilanes from silicon atoms and methyl halides: a combined matrix-spectroscopic and density functional theory study, 341
Metallic nanoparticles
Synthesis, stabilization, and applications of nanoscopic siloxane–metal particle conjugates, 24
Metal silyl complexes
Reaction of hydrogenosilanes with dimethyl Pt(II) complexes promoted by hemilabile P,N-chelating ligands, 183
Methane
Silylgermylstannylmethanes, 379
Methyl/silyl exchange
Reaction of hydrogenosilanes with dimethyl Pt(II) complexes promoted by hemilabile P,N-chelating ligands, 183
Mössbauer
Bis-silyl substituted ferrocenylenes, including dicyanovinyl electron-withdrawing groups, as potential non-linear optical materials, 235
Muscarinic receptors
Synthesis and pharmacological characterization of new silicon-based W84-type allosteric modulators for ligand binding to muscarinic M_2 receptors, 75

Nanomaterials
Organosilicon chemistry and nanoscience, 32
Nanosience
Organosilicon chemistry and nanoscience, 32
Nano-size aggregate
Tip-substituted cage and cyclic silanols, 175
NBO theory
Comparison of steric hindrance in silylenium and carbenium cations and their complexes: Natural steric analysis, 164
Nickel
Synthesis and characterisation of bis(amino)silylene–nickel(0),–palladium(II),–platinum(0),–platinum(II) and copper(I) complexes, 321
NLO
Bis-silyl substituted ferrocenylenes, including dicyanovinyl electron-withdrawing groups, as potential non-linear optical materials, 235
NMR- and IR-spectroscopy
Phenylsilanetriol — synthesis, stability, and reactivity, 313
NMR spectroscopy
Synthesis and characterization of cyano-substituted disilacyclobutane rings and poly(silylenemethylene) polymers, 272
The chemical shift tensor of silylenes, 251
Non-ionic bases
Anionic ring-opening polymerization of cyclic organosiloxanes using phosphorus ylides as strong non-ionic bases, 281
Norrish type cleavage
Electronic and steric effects of silyl groups in silicon-directed Norrish type cleavages, 198

Octamethylcyclotetrasiloxane
Anionic ring-opening polymerization of cyclic organosiloxanes using phosphorus ylides as strong non-ionic bases, 281
Octamethyl-1,4-dioxatetrasilacyclohexane
Tertiary trisilyloxonium ion in cationic ring-opening polymerisation of a model cyclic siloxane, octamethyl-1,4-dioxatetrasilacyclohexane, 373
OH-functionalized organotrialkoxysilanes
Poly(silsesquioxanes) derived from the hydrolytic condensation of organotrialkoxysilanes containing hydroxyl groups, 42
Organoalkoxysilane
Synthesis of multilayered silica-based hybrid films from difunctional organosilanes by co-hydrolysis and polycondensation with tetraalkoxysilane, 223
Organosilicon chemistry
Organosilicon chemistry and nanoscience, 32
Oxidative addition
Reaction of hydrogenosilanes with dimethyl Pt(II) complexes promoted by hemilabile P,N-chelating ligands, 183

Palladium
Synthesis and characterisation of bis(amino)silylene–nickel(0),–palladium(II),–platinum(0),–platinum(II) and copper(I) complexes, 321
Pentacoordinate
Donor-stabilized silyl cations: Part 7: Neutral hexacoordinate and ionic pentacoordinate silicon chelates with *N*-isopropylideneimino-acylimidato ligands, 202
Phase transfer catalysis
Novel fluoride ion mediated synthesis of unsymmetrical siloxanes under phase transfer catalysis conditions, 52
Phenylsilanetriol
Phenylsilanetriol — synthesis, stability, and reactivity, 313
Phosphenes
Classical planar doubly bonded Si-substituted silenes—a boundary system between olefins and heavier Group 14 analogs: Geometric and electronic structures, rotational barriers about the Si=C double bond, and comparison with the analogs and isoelectronic phosphenes, further evidence against C-ylides of silicon, 257
Phosphorane
Classical planar doubly bonded Si-substituted silenes—a boundary system between olefins and heavier Group 14 analogs: Geometric and electronic structures, rotational barriers about the Si=C double bond, and comparison with the analogs and isoelectronic phosphenes, further evidence against C-ylides of silicon, 257
Phosphorus ylides
Anionic ring-opening polymerization of cyclic organosiloxanes using phosphorus ylides as strong non-ionic bases, 281
Photoisomerizations
Dihalodimethylsilanes from silicon atoms and methyl halides: a combined matrix-spectroscopic and density functional theory study, 341
Photolysis
Electronic and steric effects of silyl groups in silicon-directed Norrish type cleavages, 198
Platinum
Synthesis and characterisation of bis(amino)silylene–nickel(0),–palladium(II),–platinum(0),–platinum(II) and copper(I) complexes, 321
Polyamines
Syntheses of novel *N*-[bis(trimethylsilyl)methyl]-1,2- and 1,3-diamines, 306
Polyhedral oligomeric silsesquioxanes (POSS)
Poly(silsesquioxanes) derived from the hydrolytic condensation of organotrialkoxysilanes containing hydroxyl groups, 42
Polymer
Synthesis, stabilization, and applications of nanoscopic siloxane–metal particle conjugates, 24
Polymerization
Anionic ring-opening polymerization of cyclic organosiloxanes using phosphorus ylides as strong non-ionic bases, 281
Polysiloxanes
Synthesis and photophysical properties of novel fluorescent silicones, 101
Synthesis, stabilization, and applications of nanoscopic siloxane–

metal particle conjugates, 24
Poly(silsesquioxanes)
Poly(silsesquioxanes) derived from the hydrolytic condensation of organotrialkoxysilanes containing hydroxyl groups, 42
Poly(silylenemethylene)
Synthesis and characterization of cyano-substituted disilacyclobutane rings and poly(silylenemethylene) polymers, 272
Porosity
Synthesis and characterization of alkylene-bridged silsesquicarbodiimide hybrid xerogels, 127

Reaction mechanisms
Dihalodimethylsilanes from silicon atoms and methyl halides: a combined matrix-spectroscopic and density functional theory study, 341
Reaction rate
Compensation effect in trichlorosilane synthesis, 151
Ring-opening polymerisation
Tertiary trisilyloxonium ion in cationic ring-opening polymerisation of a model cyclic siloxane, octamethyl-1,4-dioxatetrasilacyclohexane, 373
Rotational barriers
Classical planar doubly bonded Si-substituted silenes—a boundary system between olefins and heavier Group 14 analogs: Geometric and electronic structures, rotational barriers about the Si=C double bond, and comparison with the analogs and isoelectronic phosphenes, further evidence against C-ylides of silicon, 257
Ruthenium catalysts
The ruthenium-catalyzed silylation of aromatic C–H bonds with triethylsilane, 134
Ruthenium complex
Synthesis and structural characterization of *trans*-tactic siloxylene-vinylene-*p*-phenylene polymers via ADMET copolymerization and silylative coupling (SC) polycondensation, 228

Self-assembly
Synthesis of multilayered silica-based hybrid films from difunctional organosilanes by co-hydrolysis and polycondensation with tetraalkoxysilane, 223
Silacarbonyl ylides
Intramolecular cycloadditions of silacarbonyl ylides tethered to unactivated dipolarophiles: a new route to bicyclosilaoxolanes, 368
Silacyclopropabenzene
Syntheses and structures of silicon analogues of cyclopropabenzenes, 118
Silaesterifications
Synthesis, stabilization, and applications of nanoscopic siloxane–metal particle conjugates, 24
Silaethenes
Synthesis of the first long-lived bis-silene, 58
Silanes
Dihalodimethylsilanes from silicon atoms and methyl halides: a combined matrix-spectroscopic and density functional theory study, 341
Synthesis and reactivity of a novel oligosilyl anion, 158
Synthesis of the first long-lived bis-silene, 58
Silanol
Tip-substituted cage and cyclic silanols, 175
Silenes
Classical planar doubly bonded Si-substituted silenes—a boundary system between olefins and heavier Group 14 analogs: Geometric and electronic structures, rotational barriers about the Si=C double bond, and comparison with the analogs and isoelectronic phosphenes, further evidence against C-ylides of silicon, 257
Synthesis of the first long-lived bis-silene, 58
Silicon
Donor-stabilized silyl cations: Part 7: Neutral hexacoordinate and ionic pentacoordinate silicon chelates with *N*-isopropylideneimino-acylimidato ligands, 202
Electronic and steric effects of silyl groups in silicon-directed Norrish type cleavages, 198
gem-Silylborylation approach for tri- and tetrametalmethanes: the first synthesis of boryl(germyl)(silyl)(stannyl)methanes, 286
Synthesis and pharmacological characterization of new silicon-based W84-type allosteric modulators for ligand binding to muscarinic M_2 receptors, 75
Synthesis and reactivity of a novel oligosilyl anion, 158
Synthesis, crystal structure, and photoreaction of a disiloxane bearing two 2-(phenylazo)phenyl groups, 192
Synthesis of the first long-lived bis-silene, 58
Synthesis, structure and isomerization of $A_2Si{=}SiB_2$-type tetrakis(trialkylsilyl)disilenes, 105
Silicon-based drugs
Synthesis and pharmacological characterization of new silicon-based W84-type allosteric modulators for ligand binding to muscarinic M_2 receptors, 75
Silicones
Synthesis and photophysical properties of novel fluorescent silicones, 101
Silicon–phosphorus compounds
Synthesis and molecular structure of fluoro(triphosphanyl)silane and attempts to synthesize a silylidyne–phosphane, 294
Silsesquioxane
Tip-substituted cage and cyclic silanols, 175
Silver organosols
Synthesis, stabilization, and applications of nanoscopic siloxane–metal particle conjugates, 24
Silyl
Silylgermylstannylmethanes, 379
α-Silylamines
Syntheses of novel *N*-[bis(trimethylsilyl)methyl]-1,2- and 1,3-diamines, 306
Silyl anions
Synthesis and reactivity of a novel oligosilyl anion, 158
Silylative coupling
Synthesis and structural characterization of *trans*-tactic siloxylene-vinylene-*p*-phenylene polymers via ADMET copolymerization and silylative coupling (SC) polycondensation, 228
Silylborane
gem-Silylborylation approach for tri- and tetrametalmethanes: the first synthesis of boryl(germyl)(silyl)(stannyl)methanes, 286
α-Silyl carbocation
Cationic rearrangements controlled by the presence of a silyl group, 84
β-Silyl carbocation
Cationic rearrangements controlled by the presence of a silyl group, 84
Silylcarbodiimides
Synthesis and characterization of alkylene-bridged silsesquicarbodiimide hybrid xerogels, 127
Silyl cation
Donor-stabilized silyl cations: Part 7: Neutral hexacoordinate and ionic pentacoordinate silicon chelates with *N*-isopropylideneimino-acylimidato ligands, 202
Silyl complexes
Synthesis and characterisation of bis(amino)silylene–nickel(0),–palladium(II),–platinum(0),–platinum(II) and copper(I) complexes, 321
Silylcyanide
Synthesis and characterization of cyano-substituted disilacyclobutane rings and poly(silylenemethylene) polymers, 272

Silylene
The chemical shift tensor of silylenes, 251
Silylene complexes
Synthesis and characterisation of bis(amino)silylene–nickel(0),–palladium(II),–platinum(0),–platinum(II) and copper(I) complexes, 321
Silylenes
Relationship between stability and dimerization ability of silylenes, 112
Silylenium ion
Comparison of steric hindrance in silylenium and carbenium cations and their complexes: Natural steric analysis, 164
Silyl enol ether
$GaCl_3$-catalyzed α-ethynylation reaction of silyl enol ethers, 94
Silylidyne–phosphanes
Synthesis and molecular structure of fluoro(triphosphanyl)silane and attempts to synthesize a silylidyne–phosphane, 294
^{29}SiNMR
Synthesis, structure and isomerization of $A_2Si{=}SiB_2$-type tetrakis(trialkylsilyl)disilenes, 105
^{29}Si-NMR
Tertiary trisilyloxonium ion in cationic ring-opening polymerisation of a model cyclic siloxane, octamethyl-1,4-dioxatetrasilacyclohexane, 373
Si–O–C bonds
Poly(silsesquioxanes) derived from the hydrolytic condensation of organotrialkoxysilanes containing hydroxyl groups, 42
Sol–gel process
Synthesis of multilayered silica-based hybrid films from difunctional organosilanes by co-hydrolysis and polycondensation with tetraalkoxysilane, 223
Stability
Phenylsilanetriol — synthesis, stability, and reactivity, 313
Stannyl
Silylgermylstannylmethanes, 379
Steric effect
Comparison of steric hindrance in silylenium and carbenium cations and their complexes: Natural steric analysis, 164
Strain energies
Classical planar doubly bonded Si-substituted silenes—a boundary system between olefins and heavier Group 14 analogs: Geometric and electronic structures, rotational barriers about the Si=C double bond, and comparison with the analogs and isoelectronic phosphenes, further evidence against C-ylides of silicon, 257
Substituent effect
Classical planar doubly bonded Si-substituted silenes—a boundary system between olefins and heavier Group 14 analogs: Geometric and electronic structures, rotational barriers about the Si=C double bond, and comparison with the analogs and isoelectronic phosphenes, further evidence against C-ylides of silicon, 257
Synthesis
Synthesis and characterization of alkylene-bridged silsesquicarbodiimide hybrid xerogels, 127
Synthetic utilization
Selective synthesis of halosilanes from hydrosilanes and utilization for organic synthesis, 3

Tetrametalmethane
gem-Silylborylation approach for tri- and tetrametalmethanes: the first synthesis of boryl(germyl)(silyl)(stannyl)methanes, 286
Tetrasilyldisilenes
Synthesis, structure and isomerization of $A_2Si{=}SiB_2$-type tetrakis(trialkylsilyl)disilenes, 105
TGA
Phenylsilanetriol — synthesis, stability, and reactivity, 313
Thioacylsilanes
α,β-Unsaturated thioacylsilanes as efficient dienes in hetero Diels–Alder reactions, 363
Thioaldehydes
α,β-Unsaturated thioacylsilanes as efficient dienes in hetero Diels–Alder reactions, 363
Three-membered ring
Syntheses and structures of silicon analogues of cyclopropabenzenes, 118
Transannular interaction
Thermolysis of bis(pentacoordinate) silicon compound bearing two 1-fluorodisilanyl units at 4- and 8-positions on 1,5-bis(dimethylamino)naphthalene ring: construction of disilapyrene skeleton and cyclophane-shaped siloxane dimer, 215
Trichlorosilane
Compensation effect in trichlorosilane synthesis, 151
Trimethylsilylation
Phenylsilanetriol — synthesis, stability, and reactivity, 313
Triorganosilane
The ruthenium-catalyzed silylation of aromatic C–H bonds with triethylsilane, 134

Unsymmetrical siloxanes
Novel fluoride ion mediated synthesis of unsymmetrical siloxanes under phase transfer catalysis conditions, 52
UV-MALDI-TOF MS
Poly(silsesquioxanes) derived from the hydrolytic condensation of organotrialkoxysilanes containing hydroxyl groups, 42
UV spectroscopy
The chemical shift tensor of silylenes, 251

Vinylsilane
Acid-catalyzed intramolecular addition of a carboxy group to vinylsilanes, 242
Cationic rearrangements controlled by the presence of a silyl group, 84

Wagner-Meerwein
Cationic rearrangements controlled by the presence of a silyl group, 84
Wide angle X-ray powder diffraction (WAX)
Phenylsilanetriol — synthesis, stability, and reactivity, 313

X-ray crystallographic analysis
Synthesis, crystal structure, and photoreaction of a disiloxane bearing two 2-(phenylazo)phenyl groups, 192
X-ray crystallography
Magnesium and chlorostannanes—building blocks for novel tinmodified silanes, 332
X-ray structural analysis
Synthesis, structure and isomerization of $A_2Si{=}SiB_2$-type tetrakis(trialkylsilyl)disilenes, 105
